MVL IS NOW PARTNERING WITH MIDOG TO OFFER:

An All-in-One test detecting infectious bacteria and fungi based on their DNA. Since the DNA of all bacteria and fungal organisms is analyzed, the MiDOG test covers all organisms present at the time of collection at the infection site. This DNA evidence is guiding veterinarians to cure acute and chronic infections more efficiently than ever before.

Using DNA the MiDOG test is able to detect:

Bacteria

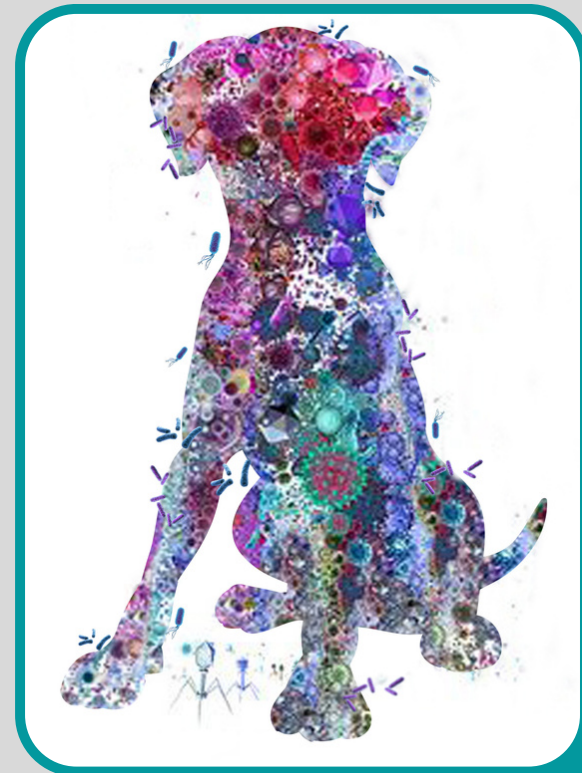

Fungi

Antibiotic
Resistance

Including difficult to culture species like:

Mycobacterium
Mycoplasma
Histoplasma
Fusarium

Using a single culture from a variety of sites (Nasal, Urine, Skin, Ears, Gi Tract and many more.)

Compatible with All Animal Species

Listen to our recorded webinar to learn more about Midog

Exclusive
Price through
Midwest Vet Lab
\$95
